Aiden Emanuel Fairman

Nationality: Switzerland and USA
Via Tamporiva 28,
6976 Lugano, CH
aidenfairman12@gmail.com
+41 79 489 39 59

EDUCATION

University of Bern **09/2024 - 06/2026**
M.S. Bioinformatics and Computational Biology
Boston University **09/2019 - 08/2023**
B.A. Computer Science

WORK EXPERIENCE

Novo Nordisk
Computational Biology Consultant - via Kelly Services | Remote **08/2025 - Present**

- Developed a single-cell atlas of midbrain regions to inform the identification of potential therapeutic targets.
- Collaborated with biologists and project stakeholders to translate research questions into computational workflows and actionable outputs.
- Provided structured analytical summaries and visualizations to support strategic discussions around target selection and research direction.
- Operated within a highly regulated pharma R&D environment, adapting analyses to evolving project needs and stakeholder requirements.

Novo Nordisk
Computational Biology Intern | Boston, MA **06/2025 - 08/2025**

- Designed and implemented modular, containerized bioinformatics pipelines for single-cell and spatial RNA-seq analyses, enabling flexible re-configuration based on project-specific requirements and improving reproducibility across teams.
- Evaluated and benchmarked spatial transcriptomics platforms (Visium, Xenium), comparing performance trade-offs to support informed technology selection for human tissue studies.
- Processed and structured complex single-cell and single-nucleus datasets into analysis-ready formats, enabling downstream exploration and interpretation by biologists.
- Communicated progress and roadblocks to cross-functional teams while prioritizing concurrent projects with multiple stakeholders.

Center for Neurological Imaging at Brigham and Women's Hospital - Harvard University Affiliated Laboratory
Research Trainee | Boston, MA **03/2024 - 10/2024**

- Developed a full-stack web application module to visualize and analyze single-cell RNA sequencing samples from the brains of patients with multiple sclerosis, enabling cost-effective analysis and interactive visualization of complex multimodal datasets.
- Evaluated and selected appropriate software tools and data models to design an efficient integration module for multimodal neuroscience data.
- Built data processing workflows for MRI images from Bruker systems for display in a web application, enabling efficient and accessible visualization of imaging data.
- Assisted research, design, and implementation of a visual integration tool of spatial single cell experiments into a broader web based application.

MITRE
Software Engineer Intern | Bedford, MA **05/2022 - 08/2022**

- Contributed to a cross-functional Agile team developing a minimum viable product for military sponsors, supporting front-end, back-end, and database development.
- Collaborated closely with engineers and stakeholders to deliver production-ready functionality under tight timelines.

ACTIVITIES & AWARDS

NCAA Division I Athlete | Boston University Swim & Dive Team
Food Pantry Volunteer | Boston Cares

- Volunteer at various food pantries in the Greater Boston Area through Boston Cares.

Global Engineering Brigades Member | Boston University

- Local school chapter of international nonprofit that partners with under resourced communities to help establish clean water pipe systems.

Language Skills

English - Mother tongue
French - B2

SKILLS

- **Programming & Analysis**: Python, R, Bash, SQL, JavaScript
- **Bioinformatics Tools**: Seurat, Scanpy, SLURM, Spatial Transcriptomics (Visium, Xenium), Cell Ranger, Space Ranger
- **Other Technical**: Git, Full-stack Web Dev (JS, HTML/CSS, RESTful APIs)
- **Workflow & Collaboration**: Agile/Scrum, process-oriented pipeline design, stakeholder communication, progress reporting, decision-support presentations
